

Teaching CS/Teacher Education (1)

- Is there a risk of AP Principles course becoming a "programming light" course?
- CS faculty don't talk to their students about teaching and education professors do not think there is demand for CS teachers.
 - Attracting students into CS at K-12 level
 - Problem of perception
 - CS as a Math/Science requirement

Teaching CS/Teacher Education (2)

- What do teachers need?
 - Programming skills - indepth
 - How many education and CS courses does a preservice teachers need to become well-qualified to teach CS? What do inservice teachers need?
 - Methods course should be giving ideas about how to teach?
- Math education majors are scared of CS courses. Why is that the case? Have an alternate to programming heavy course?
